Worth, TX Messages: 151 What is this specification? I have a Marquis 7000 NHM, Spec D I can send together. There is also a manual for servicing spec J-P (in case you don't know, the specification is the last letter in the serial number). And a general Onan service guide. Let me know which (or all) you may be interested in. What do you want to do/fix? I'm not a 7000 master yet, but I get there out of necessity. It's possible I might already run into your problem. I was wondering if anyone had any guide to this model. Also, my fuel pump and/or solenoid went bad. Has anyone had any more experience replacing the pump and solenoid than the original one from Onan? Thank you in advance for any help. Am I new to the place? People have learned the hard way, install an electric fuel pump shared from the shelf. As for solenoid, if you find the specifications on the original, the replacement can be found from the same specifications. Thank you in advance. Well, sir, it all depends on what kind of model you have. Apparently there are several different Onan 7000 generators. If you have a D 7000 (Diesel) Spec H, I have quite a few PDF guides on it.
